PROJECTS

REAL-TIME COLLABORATIVE DOCUMENT EDITOR

- Built a full-featured document editor enabling real-time multi-user collaboration with **cursor tracking** and **live sync**
- Integrated advanced features including **rich text formatting**, **comments & mentions**, **image uploads**, **templates**, and **export options** (PDF, HTML, TXT, JSON)
- Implemented **authentication (Clerk)**, **organization workspaces**, **notifications**, and deployed the fully responsive app on **Vercel** with **Convex** as the backend

LIGHTWEIGHT DATABASE IN C

- Built a simple yet functional employee database system from scratch in C, with a **custom file format** for storing and managing records.
- Gained hands-on experience with **POSIX** system calls, file handling, and low-level memory management to create a reliable backend.
- Later upgraded the project into a networked application by designing a **client-server model** using POSIX sockets and a custom communication protocol.

PERSONAL CLOUD STORAGE PLATFORM

- Developed a full-stack cloud-based file storage system using **React 19**, **Next.js 15**, App write, and **JavaScript**, enabling secure file uploads, downloads, and real-time sharing
- Implemented key features like **user authentication**, **file management (rename, delete, preview)**, global search, **sorting**, and a dynamic **dashboard** with storage insights
